

119TH CONGRESS
1ST SESSION

H. RES. 928

Affirming support for most-favored-Nation drug pricing for United States patients.

IN THE HOUSE OF REPRESENTATIVES

DECEMBER 4, 2025

Mrs. DINGELL (for herself and Mr. CRANE) submitted the following resolution; which was referred to the Committee on Energy and Commerce

RESOLUTION

Affirming support for most-favored-Nation drug pricing for United States patients.

Whereas, according to a study conducted by the Department of Health and Human Services Office of the Assistant Secretary for Planning and Evaluation and RAND Health Care in 2024, the United States spends a higher and growing share of total drug spending on new drugs compared to other countries;

Whereas the United States prices across all drugs, both brand name and generic, were nearly 2.78 times as high as prices in the comparison countries;

Whereas, on average, according to the Organization for Economic Cooperation and Development, United States citizens spend over \$1,400 on prescription drugs every year, the highest per capita drug spending in the world;

Whereas, according to polling done by the Kaiser Family Foundation, 21 percent of United States adults say they have not filled a prescription because of the cost, 23 percent say they have instead opted for over-the-counter alternatives, and 1 in 7 adults say they have cut pills in half or skipped doses of medicine in the last year because of the cost;

Whereas lowering prescription drug prices to levels obtained in nations similar to the United States has long enjoyed bipartisan support from Congress and Presidential administrations;

Whereas, on May 12, 2025, President Trump signed an Executive order titled “Delivering Most-Favored-Nation Prescription Drug Pricing to American Patients” directing the Administration to take numerous actions to bring United States drug prices in line with those paid by similar nations;

Whereas, on July 31, 2025, President Trump sent letters to leading pharmaceutical manufacturers outlining the steps they must take to bring down the prices of prescription drugs in the United States to match the lowest price offered in other developed nations; and

Whereas bipartisan Members of the 119th Congress have introduced legislation that align with the goals of President Trump’s May 12, 2025, Executive order to align drug pricing for United States patients with the lowest price offered in other developed nations: Now, therefore, be it

1 *Resolved*, That the House of Representatives—

2 (1) supports the idea that patients in the

3 United States should not be charged more than

1 those in other countries for the exact same prescrip-
2 tion drugs;

3 (2) recognizes and affirms the commitment of
4 the United States to reducing the cost of prescrip-
5 tion drugs for all United States citizens by—

6 (A) supporting policies that align the pric-
7 ing of drugs sold in the United States with that
8 of other developed nations; and

9 (B) supporting other available methods, in-
10 cluding expanding Medicare drug price negotia-
11 tion and promoting price competition in the
12 drug market; and

13 (3) supports the idea that United States citi-
14 zens should have access to high-quality, affordable
15 prescription drugs.
