

119TH CONGRESS
2D SESSION

S. 4818

To establish the Office of Social Connection Policy, to establish a national strategy on social connection, and for other purposes.

IN THE SENATE OF THE UNITED STATES

JUNE 17, 2026

Mr. MURPHY introduced the following bill; which was read twice and referred to the Committee on Homeland Security and Governmental Affairs

A BILL

To establish the Office of Social Connection Policy, to establish a national strategy on social connection, and for other purposes.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE.**

4 This Act may be cited as the “National Strategy for
5 Social Connection Act”.

6 **SEC. 2. FINDINGS.**

7 Congress finds the following:

8 (1) The health of the Nation is rightly meas-
9 ured not only by its aggregate wealth or global
10 power, but more centrally by its shared vision and

1 the bonds of connection that knit its people into a
2 community.

3 (2) The fraying of the social fabric is directly
4 implicated in the growth of loneliness, decline of
5 civic and religious participation, the disintegration of
6 communities, rising economic inequality and
7 precarity, falling economic mobility, rising rates of
8 depression, anxiety and addiction, diminishing health
9 and life expectancy and rising levels of polarization
10 and radicalization.

11 (3) These changes affect all people of the
12 United States, but fall with particular force on the
13 poor and marginalized, on children and adolescents,
14 on individuals residing in economically disadvan-
15 taged regions, on veterans and on the elderly, and
16 individuals without a college degree.

17 (4) The Surgeon General declared an epidemic
18 of loneliness and isolation on May 2, 2023.

19 (5) According to the Surgeon General, social
20 isolation and loneliness pose a significant risk to in-
21 dividual health and longevity, including a 29 percent
22 increased risk of heart disease, a 32 percent in-
23 creased risk of stroke, and for older adults, a 50
24 percent increased risk of developing dementia.

1 (6) Loneliness and social isolation increase the
2 risk for premature death by 26 percent and 29 per-
3 cent, respectively.

4 (7) The general flourishing, economic health
5 and stability of the United States, and the effective
6 functioning of government and society require re-
7 newed attention to social connection at every level of
8 society, from individual and family, to local commu-
9 nity and Nation.

10 (8) The causal connections between these
11 changes are complex, and thus the various cultural,
12 technological, demographic, economic, political and
13 institutional drivers of social connection require at-
14 tention from a dedicated expert body that may de-
15 velop and share knowledge to incorporate into the
16 national decision-making process and align relevant
17 agency actions.

18 (9) Federal funding for research and policy
19 around social connection represents an investment in
20 the future that is indispensable to sustained national
21 progress and human flourishing, and there should be
22 continuing national investment in identifying and ex-
23 panding proven local strategies, assessing how agen-
24 cies are or are not contributing to social connection,

1 and funding incentives to drive improvement com-
 2 mensurate with addressing contemporary problems.
